Thrawn trilogy audiobook reddit

I started reading the new Thrawn series two weeks ago. I finished Thrawn and Thrawn: Aliances. I loved both these books. Then I listened to the free samples of the books on Audible and I was blown away. The quality is amazing. With the sound effects and accents, etc. I am going to start Thrawn: Treason next. Should I just get the Kindle version or try out the Audible version? I'm having a bit of trouble, on the U.K. store the Star Wars trilogy hasn't been available for years due to distribution rights I think but I check back regularly just in case it pops back up on the store so I can snatch it up. Recently I was checking and, on the mobile store, it showed that 2 out of 3 of the books are suddenly available, with a price, sound sample and saying that it's free if you sign up for a free trial. Obviously I jump and get onto my desktop to get the audiobook while I can and they're suddenly not available. I can find them on mobile but for some reason whenever I search them on desktop I get nothing. I'd ideally like to get them but this to me seems like they're likely not actually available and it's just a screw up but I live in hope. What could be causing this issue? I used to think a good narrator was enough. Star Wars: Thrawn is not only a great book, but it does such a phenomenal job at including the ambient sounds of the background. Provided another level of depth that I didn't know I needed. I'd argue the ambient sounds are just as vital at setting the tone than the narrator or the author. It's also easier to keep track of the story and scene changes. I've generally been against audio books just due to not having spare time to pay attention to them, but I decided earlier this year to start listening to them while walking for some mid-afternoon exercise. I made a poor/wise mistake by selecting the Thrawn Trilogy as read by Marc Thompson as the first audio books I've ever listened to. I read the trilogy when the first came out, but wow, there were a lot of details that I had forgotten, and the way the books are read is just amazing. Marc does a fantastic job! Unfortunately as I near the end of the trilogy I have realized that there is not a vast wealth of un-abridged novels out there, and even fewer by Marc. I was going to look at listening to the Jedi Academy trilogy or the X-Wing novels, but they are only in un-abridged forms, read by someone not as good, and have generally bad reviews. Suggestions? The new Thrawn stuff seems OK at a quick glance, but I'd prefer some of the older material. I am not overly familiar with the Legacy of the Force books. Odd that he did the newest X-Wing book, but not the older ones; maybe he'll circle back at some point. Are there other Star Wars narrators (or even other franchises or genres), that are just as good/better than Marc? Any other recommended Star Wars audio books that are just as good or better?
